

Fields of Activity

Upstream

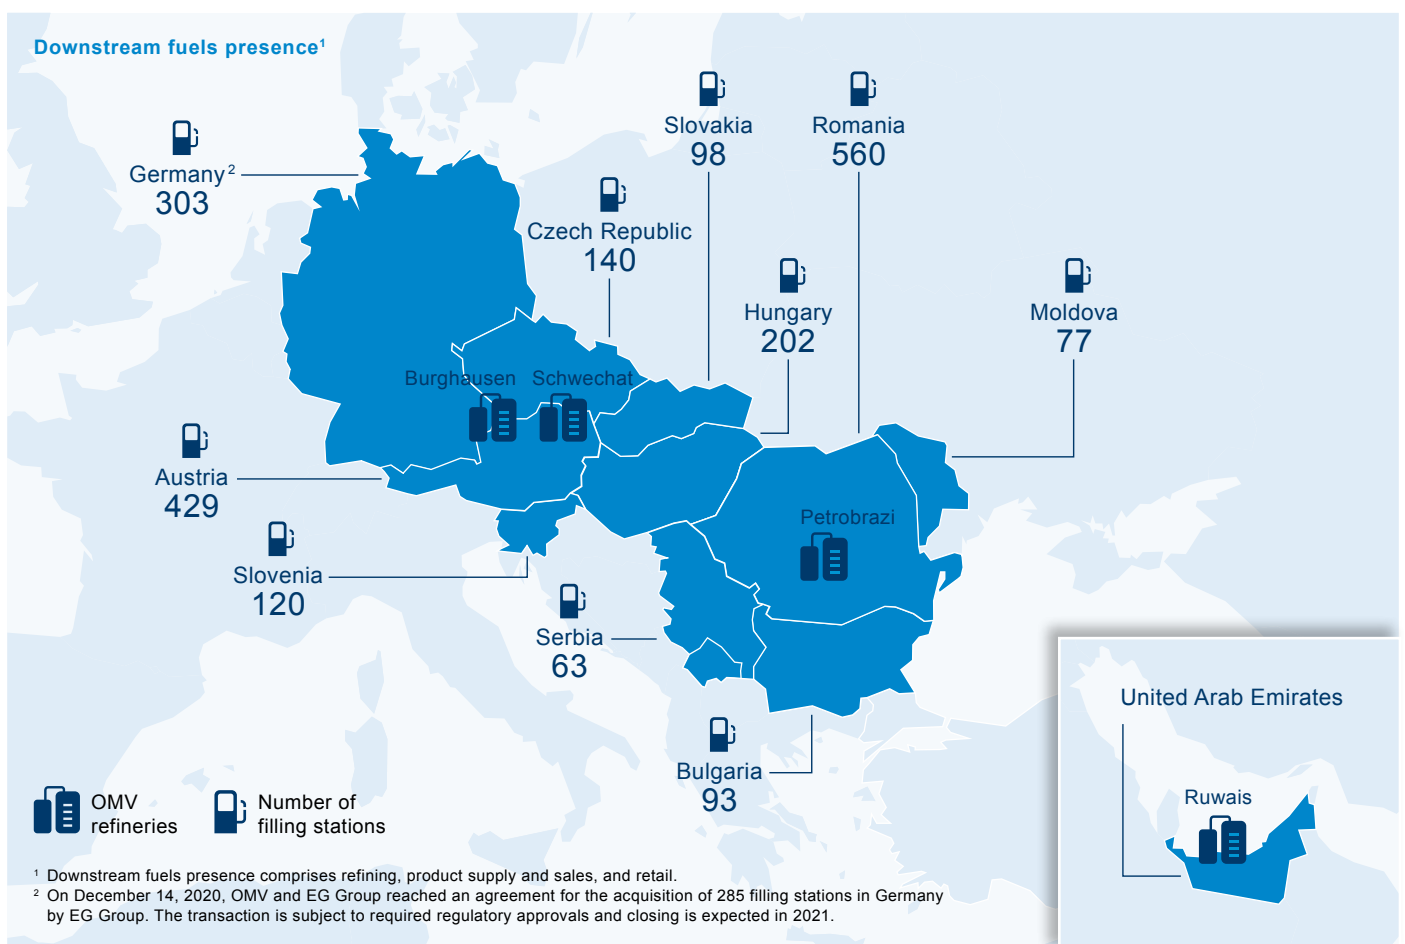

OMV Upstream explores for and produces oil and gas in its five core regions of Central and Eastern Europe, the Middle East and Africa, the North Sea, Russia, and Asia-Pacific. In 2020, daily production was 463 kboe/d (equal to 169 mn boe). While gas output accounted for 62% of total production, oil and NGL flows made up 38%. At year-end 2020, proven reserves amounted to 1.34 bn boe.

Downstream

OMV's Downstream business refines, markets fuels, chemicals, and gas. It operates three inland refineries in Europe and holds a strong market position within the areas of its refineries, serving a strong branded retail network and commercial customers. In the Middle East, it owns 15% of ADNOC Refining and ADNOC Global Trading. The processing capacity of its refineries amounts to more than 500 kbb/d. In 2020, OMV increased its share in Borealis to 75%, strengthening its chemical business and extending the value chain into polymers. In gas, OMV is active along the entire gas value chain.
